GROUP PROFILE

Reunert manages a diversified portfolio of businesses in the fields of electrical engineering, information communication technologies (ICT), and applied electronics. The group was established in 1888, by Theodore Reunert and Otto Lenz, and has contributed to the South African economy in numerous ways over the past 129 years. Reunert was listed on the JSE in 1948 and is included in the industrial goods and services (electronic and electrical equipment) sector of the JSE. The group operates mainly in South Africa with minor operations in Australia, Lesotho, Sweden, the USA, Zambia and Zimbabwe. Reunert's offices are located in Woodmead, Johannesburg, South Africa.

COMMENTARY

OVERVIEW

Reunert's 2017 results reflect a 14% growth in operating profit and a 19% growth in profit for the year. This improvement in profitability flowed through to headline earnings per share which also grew by 19%. This was achieved, as highlighted in our previous prospects statements, through a strong second half performance across all segments, including the export businesses.

The execution of the group strategy led to three further acquisitions in the year and a continued focus on customer service and operational efficiencies.

Measure	Units	2017	2016	% change
Revenue	R million	9 773	8 511	15
Operating profit (before net interest income and dividends, and empowerment transactions)	R million	1 497	1 315	14
Profit for the year	R million	1 142	963	19
Headline earnings per share	Cents	679	570	19
Normalised headline earnings per share	Cents	697	662	5

FINANCIAL PERFORMANCE

Group revenue

Group revenue increased by 15% to R9,8 billion (2016: R8,5 billion). The major area of growth was in the Electrical Engineering segment, where segment revenue grew by 28%. Revenue in the Applied Electronics segment grew by 14%, despite a stronger Rand impacting export revenue, and full export fuze production only resuming in the second half. Revenue in the ICT segment was flat. In the office automation business, revenue increased from the sales of fewer, but higher-value units. In the voice-over-internet business, the final statutory reduction in interconnect rates resulted in lower income despite the positive customer growth.

Group operating profit

Group operating profit increased by 14% from R1,3 billion to R1,5 billion. The 16% increase in the ICT segment was mainly due to the successful implementation of margin enhancement programmes, in both Nashua and ECN and volume growth on higher-volume office automation equipment and voice minutes.

The Electrical Engineering segment's operating profit improved by 14%, driven by strong performance in our cable businesses and the incorporation of Zamefa, our acquisition in Zambia. The stronger Rand negatively impacted our circuit breaker business.

Despite profit growth in the majority of Applied Electronics segment's businesses, the segment returned a 10% decline in operating profit because of reduced export sales in the fuze business. The fuze business returned to full production in the second half of the year after securing new long-term contracts.

Group cash resources

We continued our share buyback programme under general authority from shareholders. During the year, we repurchased a further 2,9 million (2016: 0,4 million) shares at an average price of 6 739 (2016: 6 269 cents) cents per share, including transaction costs. This brings the total shares repurchased since commencing the programme in September 2016 to 3,3 million or 2% of shares in issue.

Capital of R199 million was allocated for the share buyback programme and R241 million was invested in acquisitions, reflecting the execution of the Board's dual mandate to return surplus cash to shareholders and seek appropriate acquisitions.

At year end, we had combined money market deposits and other liquid resources totalling R1 455 million (2016: R1 982 million). This provides sufficient residual cash resources to continue the implementation of our strategy.

SEGMENTAL RESULTS

Despite the challenging local political and economic conditions, Reunert's operating profit from our traditional businesses in the Electrical Engineering and ICT segments again increased in real terms. Applied Electronics only returned to full export production in the second half of the year, but still delivered a solid segmental performance. The positive contribution from our acquisitions assisted in the delivery of a strong overall operational result.

Electrical Engineering

The double-digit growth in Electrical Engineering was driven by the acquisition of Zamefa and the strong performance of the power and telecommunications cable business units. Revenue increased by 28% to R5,2 billion (2016: R4,1 billion) and operating profit by 14% from R610 million to R696 million.

Telecom Cables continued to benefit from the local FTTX¹ roll-out and enjoyed strong production volumes. The diverse market position of the South African power cable business allowed it to secure meaningful volumes, despite the weak general infrastructure demand. The integration of the Zambian operation, Zamefa, progressed well and many of the vertical integration benefits are being realised. All of the cable business units have implemented long-term continuous improvement projects, and efficiency gains were realised in all factories.

Low Voltage, our circuit breaker business, faced a challenging year as local investor sentiment slowed residential and commercial building activity. The strong Rand softened export margins, which added pressure. Several new product releases, including high-capacity DC breakers for telecommunication and renewable energy applications, supported this business unit's performance, which ended the year slightly down on the prior year.

Information Communication Technologies

The ICT segment delivered a strong performance underpinned by positive margin movement in both the office automation and voice business portfolios, despite segment revenue remaining flat at R3,3 billion. Operating profit increased by 16% from R549 million to R635 million.

¹ *Fibre-to-the-x: Collective term for various optical fibre delivery topologies that are categorised according to where the fibre terminates.*

Nashua progressed well in the execution of its strategy to change from an office automation hardware supplier to a total office services provider to its 28 000-strong customer base. A continued move to larger machines underpinned its positive market share movement, and a strong Rand supported the hardware margins. Several newly launched services increased cross-sell revenue and improved the performance of the franchise channel.

Our voice business, ECN, enjoyed a 9% growth to 1,2 billion minutes carried on the network. The impact of lower business confidence reduced demand per customer. This was offset by substantial growth in the number of customers serviced. We invested R12 million into the ECN network, and the upgrade has resulted in a more robust, high-quality and simplified network, creating scale for our new business-internet-access product suite. The ability to provide both voice and data to our customers offers a new diversified sales stream and underpins the continued growth rate of this business.

Our in-house finance book in Quince Capital increased from R2,1 billion to R2,4 billion on the back of improved office automation sales. The quality of the book remains high and, despite the tough economic times, bad debts remain well below industry norms.

Applied Electronics

The Applied Electronics segment's revenue increased by 14% to R1,7 billion (2016: R1,5 billion), and operating profit reduced by 10% to R276 million (2016: R305 million), due to lower export orders in the first six months. As the year progressed, the order position improved significantly. The strong Rand negatively impacted export margins particularly in the areas of export fuzes, mining surveillance radars and electronic subassemblies. Fuchs Electronics is now at full production with large-scale export orders.

Reutech Radar Systems had a record year in the mining and commercial market sectors. The increased volume improved production efficiencies and this, to a large degree, offset the stronger Rand's impact on its export margins. The business unit secured a large defence export order which improved our year-on-year performance and will support sales throughout the next financial year.

Reutech Communications completed the industrialisation of its new range of tactical communication products. While this took longer than expected, record production levels during the second half of the year were achieved. Efficiencies are reaching the levels envisaged at the start of the capital investment project. Securing the next phase of orders from the local customer remains an important element of this unit's business case.

Reutech Solutions responded well to their major customers' ongoing budget reductions and delivered a solid result.

The acquired businesses performed well. Omnigo executed their advanced PCB export orders successfully and, as a result, received further hard currency orders. This allows them to continue operating at full capacity. More equipment was deployed into the business unit which increased their capability to manufacture high-specification electronic sub-assemblies and, in turn, to enter new geographic markets. Nanoteq, our specialist encryption business, performed in line with its business case despite key customers in a new geography having budget constraints that delayed the placement of a large order.

DIRECTORATE

Phuti Mahanyele resigned as an independent non-executive director and member of the Audit and the Social, Ethics and Transformation committees with effect from 1 November 2017 due to her growing commitments as the owner of an investment company. The Board would like to express its gratitude to Ms Mahanyele for her tenure.

There were no other changes to the composition of either the Board or Board committees during the year under review.

PROSPECTS

Reunert's traditional businesses have continued to deliver real growth in tough local economic conditions. Applied Electronics' export orders are at record high levels and should translate into a strong operating performance, with exchange rates providing some uncertainty in the financial results. Subject to no adverse changes in the local economic, social and political environment, we expect another year of real growth in 2018. The order mix of the group again favours a stronger financial performance in the second half of the financial year.

CASH DIVIDEND

Notice is hereby given that a gross final cash dividend No 183 of 354,0 cents per ordinary share (2016: 326,0 cents per share) has been declared by the directors for the year ended 30 September 2017.

The dividend has been declared from retained earnings, bringing the total dividends declared out of 2017 profit for the year to 474 cents per share.

A dividend withholding tax of 20% will be applicable to all shareholders who are not exempt from, or who do not qualify for a reduced rate of withholding tax.

Accordingly for those shareholders subject to withholding tax, the net dividend amounts to 283,20 cents per share.

The issued share capital at the declaration date is 184 324 396 ordinary shares.

In compliance with the requirements of Strate, the following dates are applicable:

Last date to trade (cum dividend)	Tuesday, 16 January 2018
First date of trading (ex dividend)	Wednesday, 17 January 2018
Record date	Friday, 19 January 2018
Payment date	Monday, 22 January 2018

Shareholders may not dematerialise or rematerialise their share certificates between Wednesday, 17 January 2018 and Friday, 19 January 2018, both days inclusive.

On behalf of the board

Trevor Munday

NOTES

1 Basis of preparation

These preliminary condensed consolidated financial statements have been prepared in compliance with the framework concepts and the recognition and measurement requirements of International Financial Reporting Standards (IFRS) in effect for the group at 30 September 2017, and further comply with the SAICA Financial Reporting Guides, as issued by the Accounting Practices Committees and the Financial Reporting pronouncements as issued by the Financial Reporting Standards Council. These condensed consolidated financial statements contain the minimum information as required by IAS 34 – Interim Financial Reporting, and complies with the Listings Requirements of the JSE Limited and the requirements of the Companies Act, 71 of 2008, of South Africa. This report was compiled under the supervision of NA Thomson CA(SA) (chief financial officer).

The group's accounting policies applied for the year ended 30 September 2017 were consistent with those applied in the prior year's audited consolidated annual financial statements. These accounting policies comply with IFRS.

Goodwill		
Carrying value at the beginning of the year	737	653
Acquisition of businesses ¹	171	90
Adjustment to goodwill on finalisation of acquisition made in prior year	33	–
Disposal of a controlling interest in a subsidiary	(12)	–
Disposal of businesses	(9)	–
Exchange differences on consolidation of foreign subsidiaries	1	(6)
Carrying value at the end of the year	921	737

¹ *At 30 September 2017, the purchase price allocation of the acquisitions made in 2017 have not been finalised and therefore the amounts reported are provisional and subject to change.*

R million	Reviewed 2017	Audited 2016
8 Put option liability		
As part of the Terra Firma and Ryonix acquisitions, the group has granted put options in favour of the non-controlling shareholders for 25% of the issued share capital, in both cases.		
<i>A reconciliation of the closing balance is as below:</i>		
Balance at the beginning of the year	–	–
Raised at acquisition at fair value	116	–
Fair value remeasurements	–	–
Unwinding of interest expense	5	–
Balance at the end of the year	121	–
The obligations were classified as level 3 instruments in the fair value hierarchy.		
For Terra Firma, the fair value of the put option liability has been determined using a discounted cash flow valuation technique and is based on multiples stipulated in the sales and purchase agreement.		
Significant unobservable inputs include:		
– The 2020 forecast revenue and net profit after tax (NPAT) have been used. This forecast is based on management's best estimate of the revenue and NPAT likely to be achieved in 2020.		
– The multiples stipulated in the sales and purchase agreement.		
– The discount rate of 8%, being the average cost of borrowing.		
The put option for Ryonix is immaterial.		
If the key unobservable inputs to the valuation model being estimated were 1% higher/lower while all the other variables were held constant, the carrying amount of the put option liabilities would decrease/increase by R3 million respectively.		
9 Long-term borrowings		
Total long-term borrowings (including finance leases) ²	84	272
Less: short-term portion (including finance leases)	(11)	(229)
	73	43

² In 2016, these borrowings included R200 million in respect of the Quince rental book, which was repaid in May 2017.

R million	Reviewed 2017
10 Acquisition of businesses	
During the current year, the group obtained control over the following entities through the acquisition of a majority interest in the equity shares:	
– Nanoteq Proprietary Limited: With effect from 1 October 2016, the group acquired 100% of the share capital of Nanoteq Proprietary Limited. The acquisition and related goodwill of R69 million is attributable to the synergies from the vertical integration with the group's other businesses in the Applied Electronics segment.	95
– Terra Firma Solutions Proprietary Limited: With effect from 1 March 2017, the group accounted for its acquisition of 51% of the share capital of Terra Firma Solutions Proprietary Limited. The acquisition and related goodwill of R88 million is attributable to the expected high growth in this business and the ability for the group to diversify into new products and geographical areas. The following options exist: a call option in favour of Reunert Limited for a further 9% (exercisable in September 2018); and a put at the option of the non-controlling interests for 25% (exercisable in either September 2019 or September 2020), which if all are exercised, will increase the group's holding of Terra Firma's share capital to 85%. At the reporting date, it is estimated that the fair value of the call option is Rnil and the fair value of the put option is R112 million. A put obligation liability has been recognised in non-current liabilities with a corresponding entry to equity. Refer to note 8.	102
– Ryonic Robotics Proprietary Limited: With effect from 1 March 2017, the group accounted for its acquisition of 74,9% of the share capital of Ryonic Robotics Proprietary Limited. The acquisition and related goodwill of R14 million is attributable to the ability of the group to leverage its interest in Ryonic into new products and geographical areas in the rapidly advancing field of robotics, automation, machine learning and autonomous machine control. A put option has been granted in favour of the non-controlling interests for some or all of the non-controlling interest's equity in the company. The put option is exercisable at any time after the fifth anniversary of the effective date of the acquisition. At the reporting date, it is estimated that the fair value of the put option is R9 million. A put obligation liability has been recognised in non-current liabilities with a corresponding entry to equity. Refer to note 8.	21
Cost of investments	218
Net borrowings acquired on acquisition	23
Gross cash flows on acquisition of businesses	241
Non-controlling interest*	14
Total funding of acquisitions	255

* Non-controlling interests have been recognised using the proportionate share basis.

R million	Reviewed 2017
10 Acquisition of businesses continued	
<i>Gross assets acquired and liabilities taken over:</i>	
Property, plant and equipment and intangible assets	82
Non-current receivables	2
Inventory	4
Gross accounts receivable and taxation**	69
Short-term borrowings	(7)
Deferred taxation	(10)
Accounts payable, provisions and taxation	(56)
Goodwill	171
Net assets acquired	255
Revenue since acquisition	170
Profit after taxation since acquisition	19
Revenue for the 12 months ended 30 September 2017 as though the acquisition dates had been 1 October 2016	270
Profit after taxation for the 12 months ended 30 September 2017 as though the acquisition dates had been 1 October 2016	29

** The value of uncollectible debtors receivable at acquisition was negligible.

Change made to prior year acquisition accounting

Metal Fabricators of Zambia Plc (Zamefa): The goodwill arising on the 2016 acquisition of Zamefa was increased by R33 million due to the reassessment of the trade receivables at acquisition. There was no impact on the actual purchase price.

2016

Refer to 2016 published results.

11 Unconsolidated subsidiary

The financial results of Cafca Limited (Cafca), a subsidiary incorporated in Zimbabwe, have not been consolidated into the group results as the group does not exercise management control:

- Reunert has not appointed a majority of the directors to the board of directors of Cafca and therefore does not control the board; and
- the difficult economic circumstances in Zimbabwe have resulted in a major liquidity crisis which renders Reunert's access to economic benefits from Cafca (e.g. dividends) such that it does not have the ability to affect its variable returns through its powers over Cafca.

The amounts involved are not material to the group's results.

At 30 September 2017, Cafca's share capital and reserves amounted to US\$15 million.

13 Litigation

There is no material litigation being undertaken against the group. The group has made adequate provision against any cases where the group considers there are reasonable prospects for the litigation to succeed. The group has adequate resources and good grounds to defend any litigation it is aware of.

14 Events after reporting date

No events have occurred after the reporting date that require additional disclosure or adjustment to the results presented.

15 External auditors review opinion

Deloitte & Touche has issued its unmodified review report on the reviewed condensed consolidated financial statements for the year ended 30 September 2017. The review was concluded in accordance with ISRE 2410 – Review of Interim Financial Information performed by the independent auditor of the entity. A copy of their unmodified review report is available for inspection at Reunert’s registered office. The auditor’s review report does not necessarily report on all information contained in this announcement. Investors are, therefore, advised that in order to obtain a full understanding of the nature of the auditor’s engagement, they should obtain a copy of that report from Reunert’s registered office. Any reference to future performance included in this announcement has not been reviewed or reported on by the auditors.
